**Rejections under 35 U.S.C. §103**

In the present Office Action, claims 1 and 9 were rejected under 35 U.S.C. § 103(a) as being obvious over United States Patent No. 6,826,004, issued to Albrecht et al., (hereinafter, "*Albrecht*") in view of Japanese Patent Application No. JP06068565A filed by Masanori Naruse (hereinafter, "*Masanori*"). While not conceding that either of the Examiner's cited references qualify as prior art but rather in the interest of expediting prosecution, Applicants have elected to traverse the Examiner's rejections as follows. Applicants reserve the right, for example in a continuation application, to establish that the Examiner's cited references do not qualify as prior art with respect to invention embodiments presently or subsequently claimed in the above-identified application.

With regard to Applicants' claims 1 and 9, the Examiner states in the present Office Action that *Albrecht* teaches a system for interfacing with and handling disk drives in an automated library having a drawer with a drawer connector, where the system comprising, "a disk driver carrier...a backplane connector...and an interface connector... application only under 35 U.S.C. 102(e), and that consequently, "This rejection under 35 U.S.C. 103(a) might be overcome by...showing that the reference is disqualified under 35 U.S.C. 103(c) as prior art in a rejection under 35 U.S.C. 103(a)."

In accordance with the Examiner's suggestion, Applicants have submitted herewith a copy of a declaration under 37 C.F.R. §1.131 previously-submitted by Applicants' representative on June 28, 2005, which includes the requisite statements under 35 U.S.C. §103(c) to disqualify *Albrecht* as prior art through 35 U.S.C. §102(e), (f), or (g) in the present obviousness rejection under 35 U.S.C. §103(a). As the Examiner has acknowledged that *Albrecht* qualifies as prior art only, if at all, under 35 U.S.C. §102(e), Applicants respectfully submit that the Examiner's rejection is traversed.
